

## CASH Prime Value Equity OFC (the "OFC")

A unit trust established under the laws of Hong Kong (registration number: BRS794)

### Important Information

- Investment involves risks. Investors should read the Explanatory Memorandum and Key Fact Statement to understand information including risk factors before they apply for the OFC.
- Investment risk: Investment in the OFC is subject to risks inherent in the underlying assets into which the OFC may invest. Accordingly, there is a risk that investors may not recoup the original amount invested in the OFC or may lose a substantial part or all of their initial investment.
- Risk of fluctuation in net asset value of the OFC: The net asset value of the OFC may rise and fall in stead of rising every day steadily. The main reasons for the fluctuation of net asset value are:
  - Volatility in stock prices: Prices of the underlying stocks invested may rise and fall which may lead to volatility of the net asset value of the OFC.
  - The investment through the Stock Connect may involve additional risks (e.g. quota limitations, operational risk, suspension risk, regulatory risk, taxation risk etc).
  - Investors should be aware that the price of and income from the shares may rise and fall. Investors may not get back the full amount invested. Past performance is not necessarily indicative of future results.
- The above information is for reference only and does not constitute any offer, solicitation, recommendation, advice or guarantee for the sale, subscription or transaction of any investment product or service to any person.
- Investment involves risk. Generally, investors should only deal in financial products they are familiar with and the risks of which they understood. Risk statements described by financial products are not exhaustive. Investor should carefully consider their own investment experience, financial position, investment goal and risk tolerance and consult their own independent financial advisers to ensure whether the situation is suitable for them.
- Connected parties transactions: From time to time, some of our staffs may have subscribed to some of the funds managed by our company. We have internal controls to ensure such subscription is in compliance with company policies and applicable rules and regulations.

The OFC has been authorised by the Securities and Futures Commission in Hong Kong (the "SFC"). SFC authorisation is not a recommendation or endorsement of the OFC nor does it guarantee the commercial merits of the OFC and its performance. It does not mean the OFC is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors. This document is issued by CASH Wealth Management Limited and has not been reviewed by the SFC.

### Investment Objective

- The investment objective of the fund is to seek medium to long term capital growth and income through investing in Hong Kong securities.\*
- The fund will invest not less than 70% of its NAV in shares of listed companies and will also invest at least 70% of its NAV in HK Securities.
- Up to 30% of the fund's NAV will invest into non-HK Securities, principally into Mainland China and the US with no more than 10% of the fund's NAV will be invested into Mainland China.

\*Either (a) listed and traded in Hong Kong, or (b) unlisted, but is (i) issued by entities incorporated in Hong Kong; or (ii) entities which have significant operations in or assets in, or (iii) derive significant portion of revenue or profits from Hong Kong.

### Investment Strategy

- The investment strategy of the fund is applying Fundamental Analysis, Technical Analysis, Investment Model Analysis and Predictive Analysis. Combining Growth Factors, Value Factors and Risk Factors for a comprehensive analysis of individual stocks.
- Core Operational Logic of the Strategy:  
Based on big data analysis, the strategy can filter and extract valuable investment signals more quickly, broadly, and accurately, while implementing strict risk management to strive for sustainable excess returns for our clients. The strategy model conducts comprehensive analysis and forecasting of individual stocks through multidimensional data analysis, including fundamentals and investment sentiment, to identify the most promising investment targets with excess potential.

Industry Distribution

Market Outlook

In August 2025, the trend of Hong Kong stock market has shown positive and steady performance. According to recent statistics, the HSI has already delivered impressive gains of over 25% this year, leading global performance. As September approaches, retail sales, consumer spending, and travel expenses during the summer season will be gradually digested. The rebound in consumer confidence is crucial for a broad-based earnings recovery. From an international perspective, the optimistic trade talk related to US-China relation in August could potentially reduce the risks from the stock market in the future. Investors are also suggested to monitor the U.S Fed's rate cutting cycle that may ease market concerns. Stocks related to consumer discretionary and financial sectors will likely lead the performance.

Commentary

Our fund outperformed the HSI index by more than 25% in August. The positive stock selection in the financials and information technology sectors mainly contribute to our excess return. In order to generate sustainable earnings in September, we will pay close attention to stocks related to information technology and automobile, in addition to the consumer discretionary and financial sectors. Although relevant market data has predicted a slight economic slowdown for the local economy, China's positive monetary policy related to infrastructure and industrial technology growth counters the prediction, which raises investor confidence. As a result, we hold the view that the Hong Kong stock market continues to present a notable investment opportunity for our fund performance.
